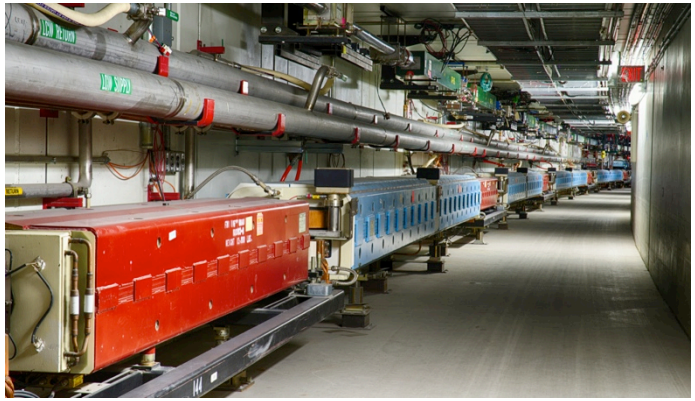
Fermilab

Managed by Fermi Research Alliance, LLC for the U.S. Department of Energy Office of Science

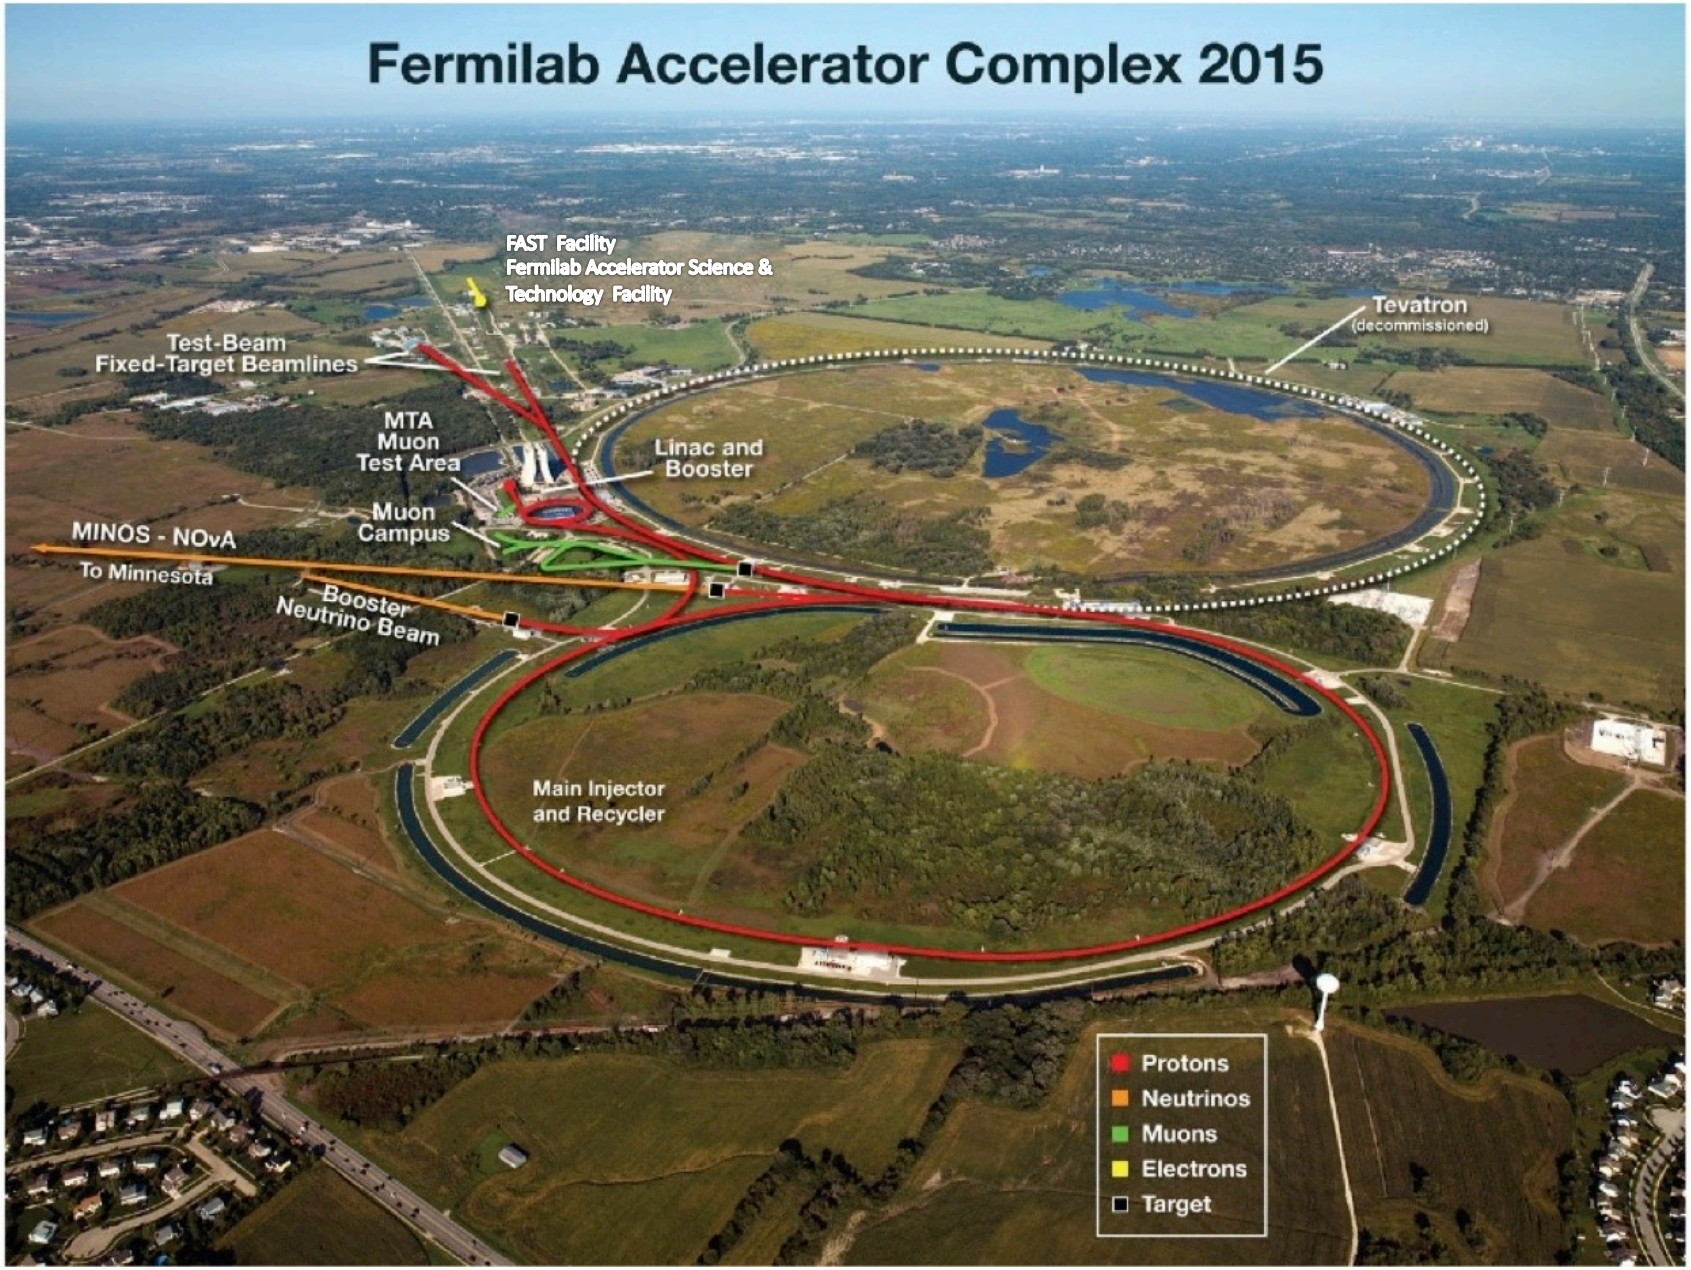
Mechanical Engineering of the Accelerators at Fermilab



Linda Valerio

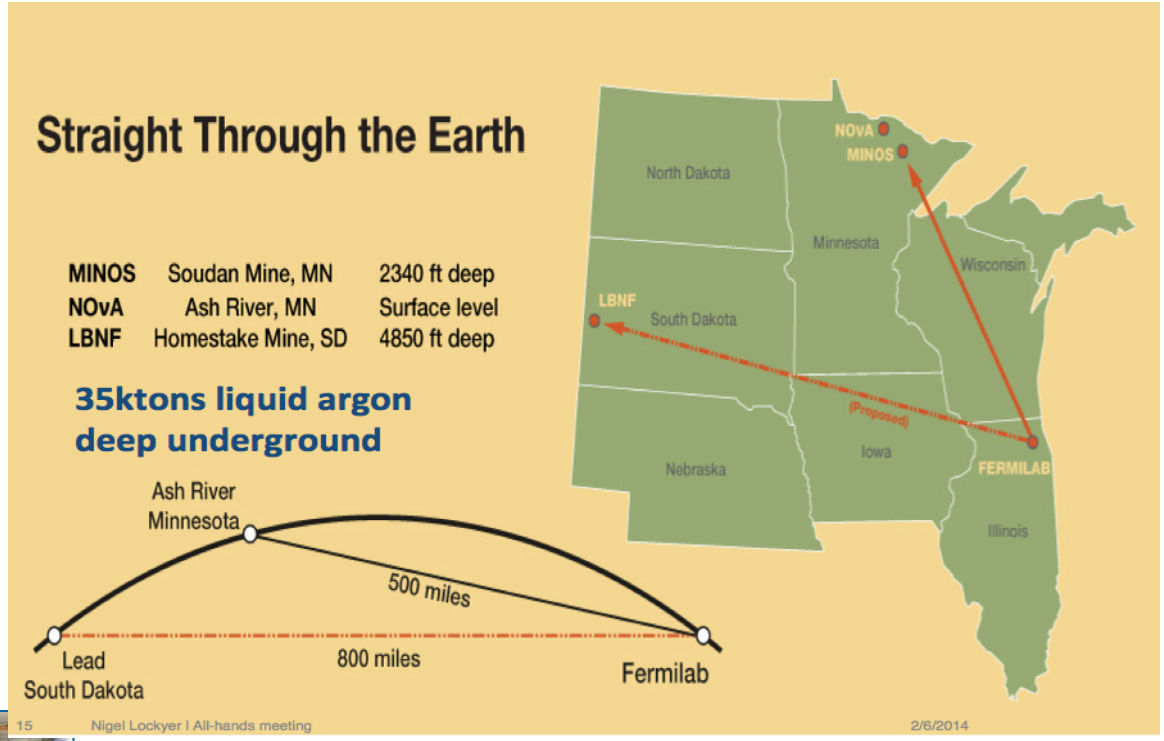
Undergraduate Lecture Series

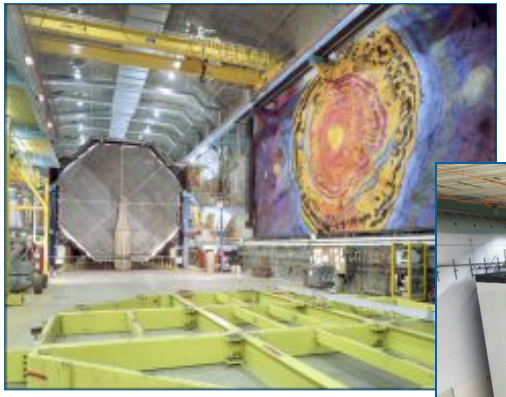
14 July 2015

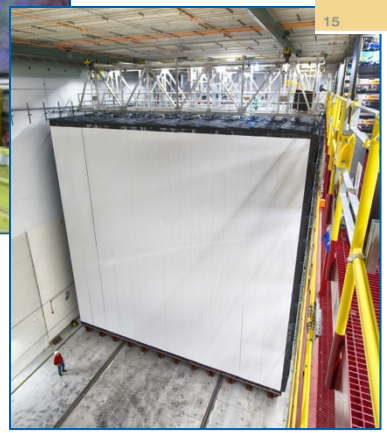


Fermilab Accelerator Complex 2015
FAST Facility
Fermilab Accelerator Science &
Technology Facility
Tevatron
(decommissioned)
Test-Beam
Fixed-Target Beamlines
MTA
Muon
Test Area
Linac and
Booster
Muon
Campus
MINOS - NOvA
To Minnesota
Booster
Neutrino Beam
Main Injector
and Recycler
Protons
Neutrinos
Muons
Electrons
Target

Neutrino Program



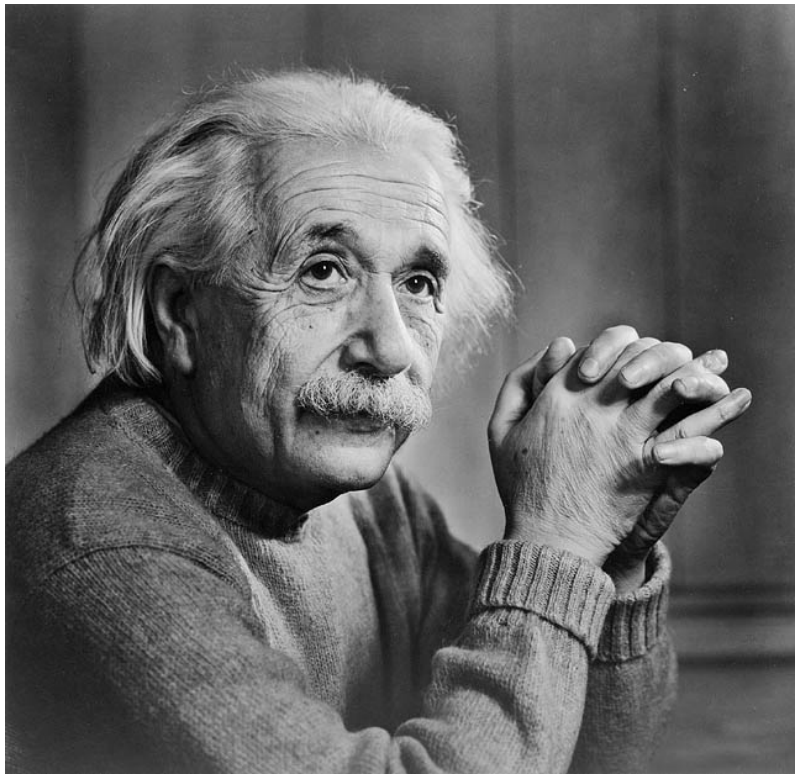




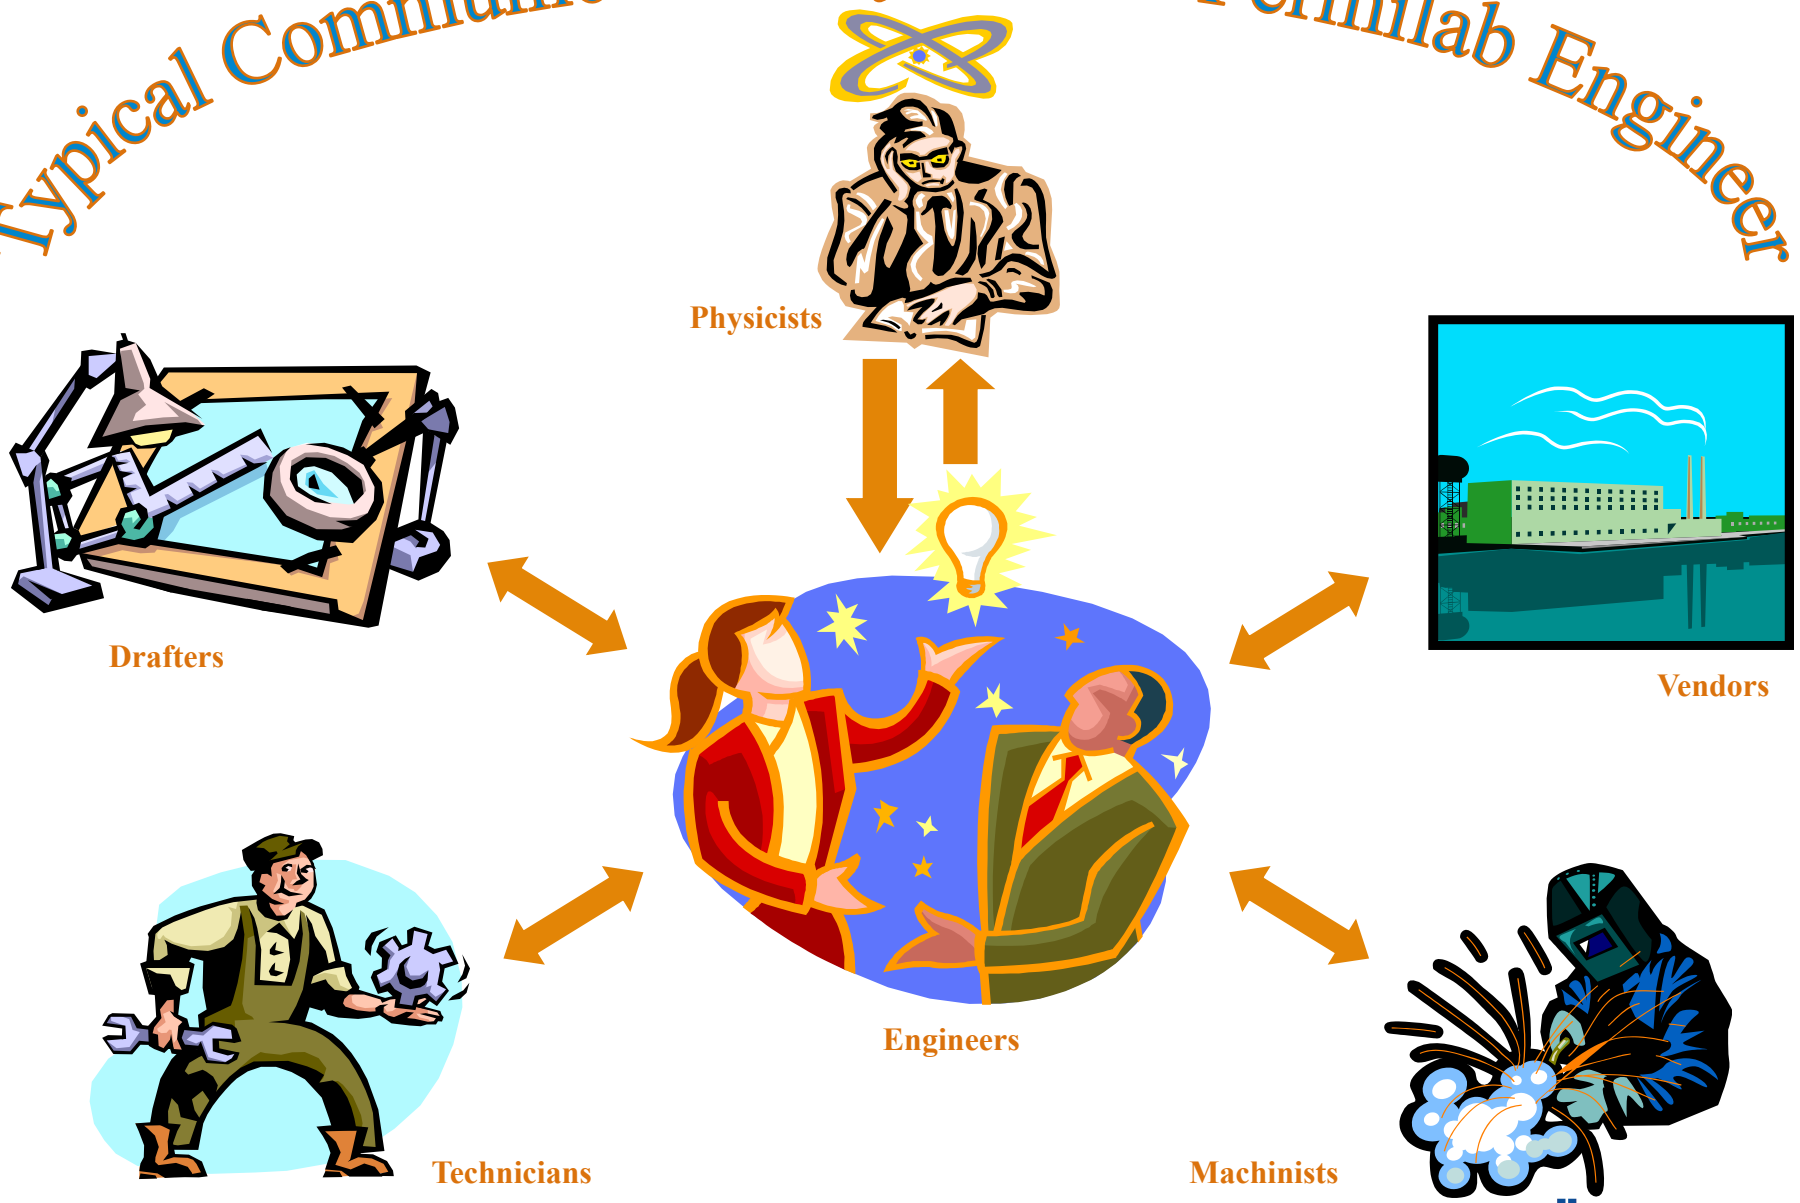
MicroBooNE
MINERvA
MINOS+
NOvA
LNBF/DUNE (proposed)

How is an Engineer Different from a Scientist?

"Scientists investigate that which already is;
Engineers create that which has never been."
- Albert Einstein



Typical Communication Cycle of a Fermilab Engineer



Examples of Physicists' Specifications

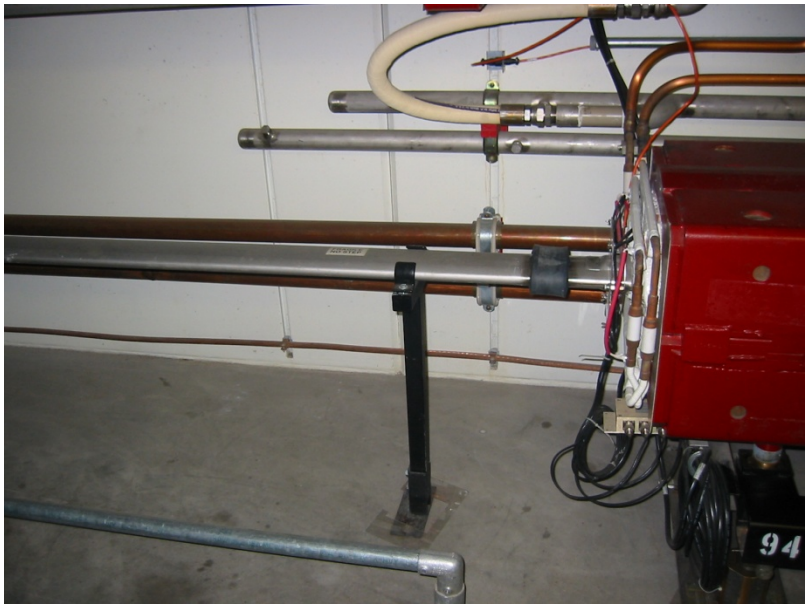
Examples of Engineering in the Main Injector Enclosure

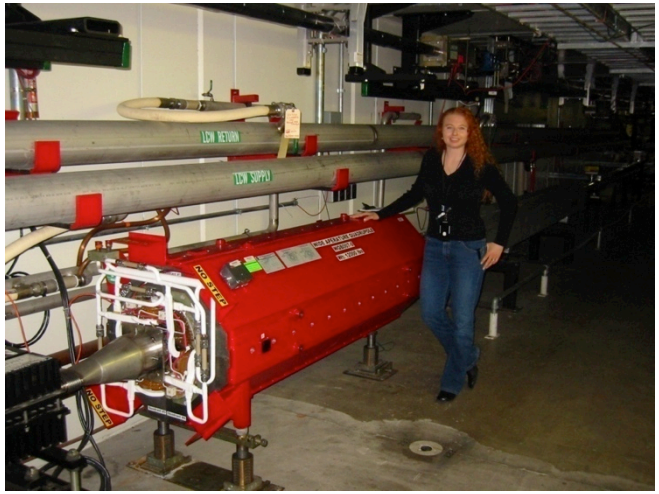
Civil

Mechanical

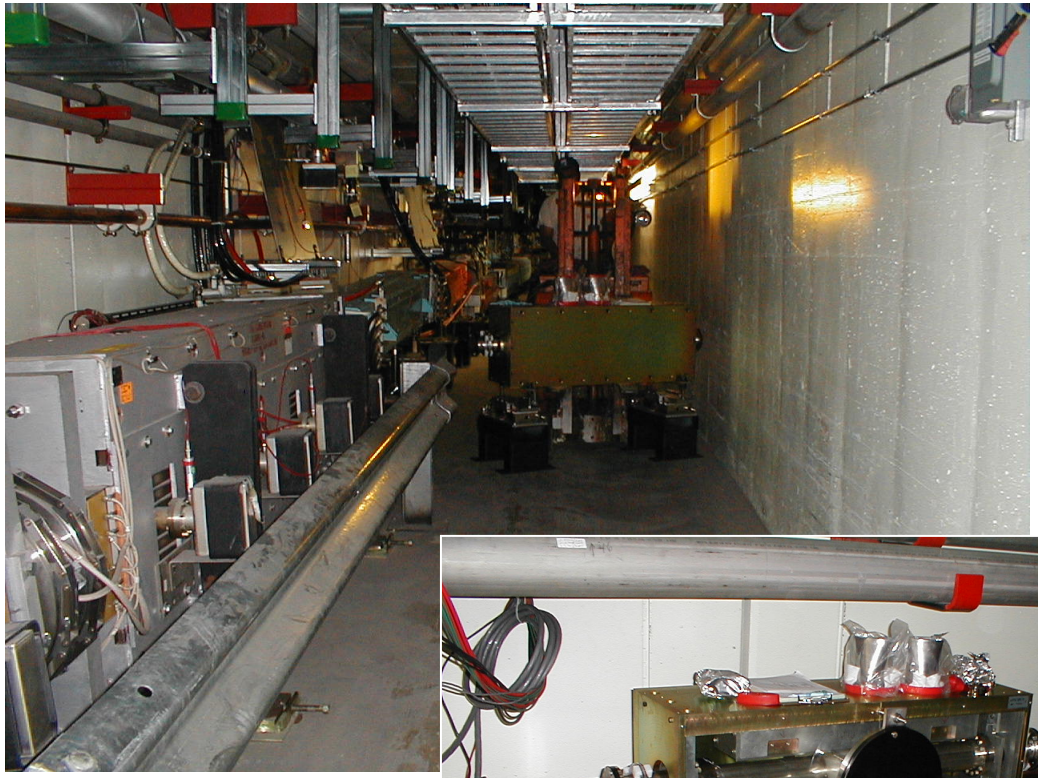
Electrical

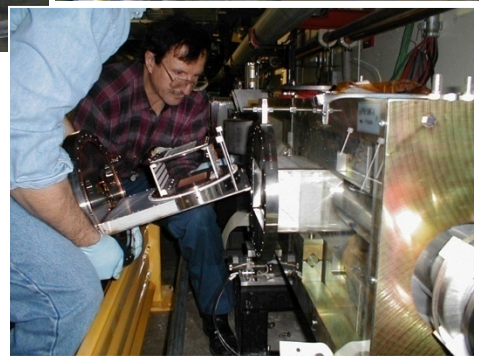
Example of a Magnet Upgrade – Wide Aperture Quadrupole

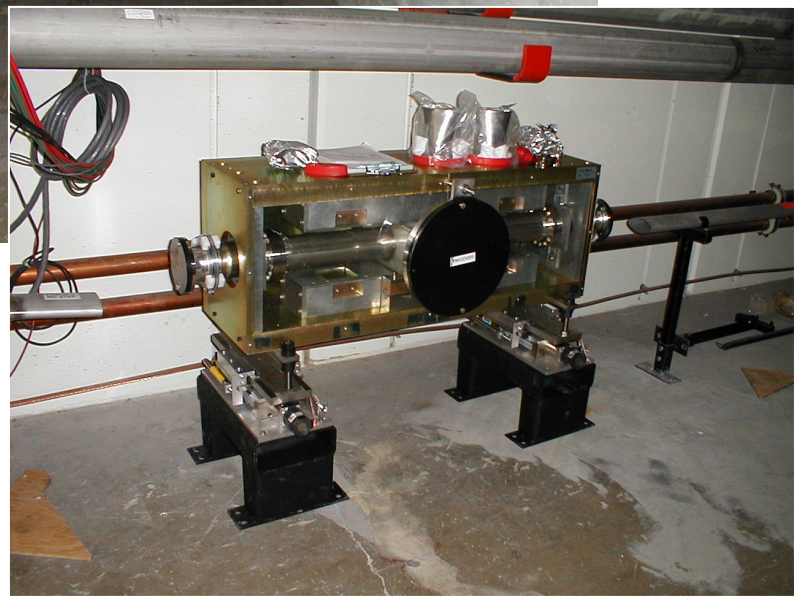




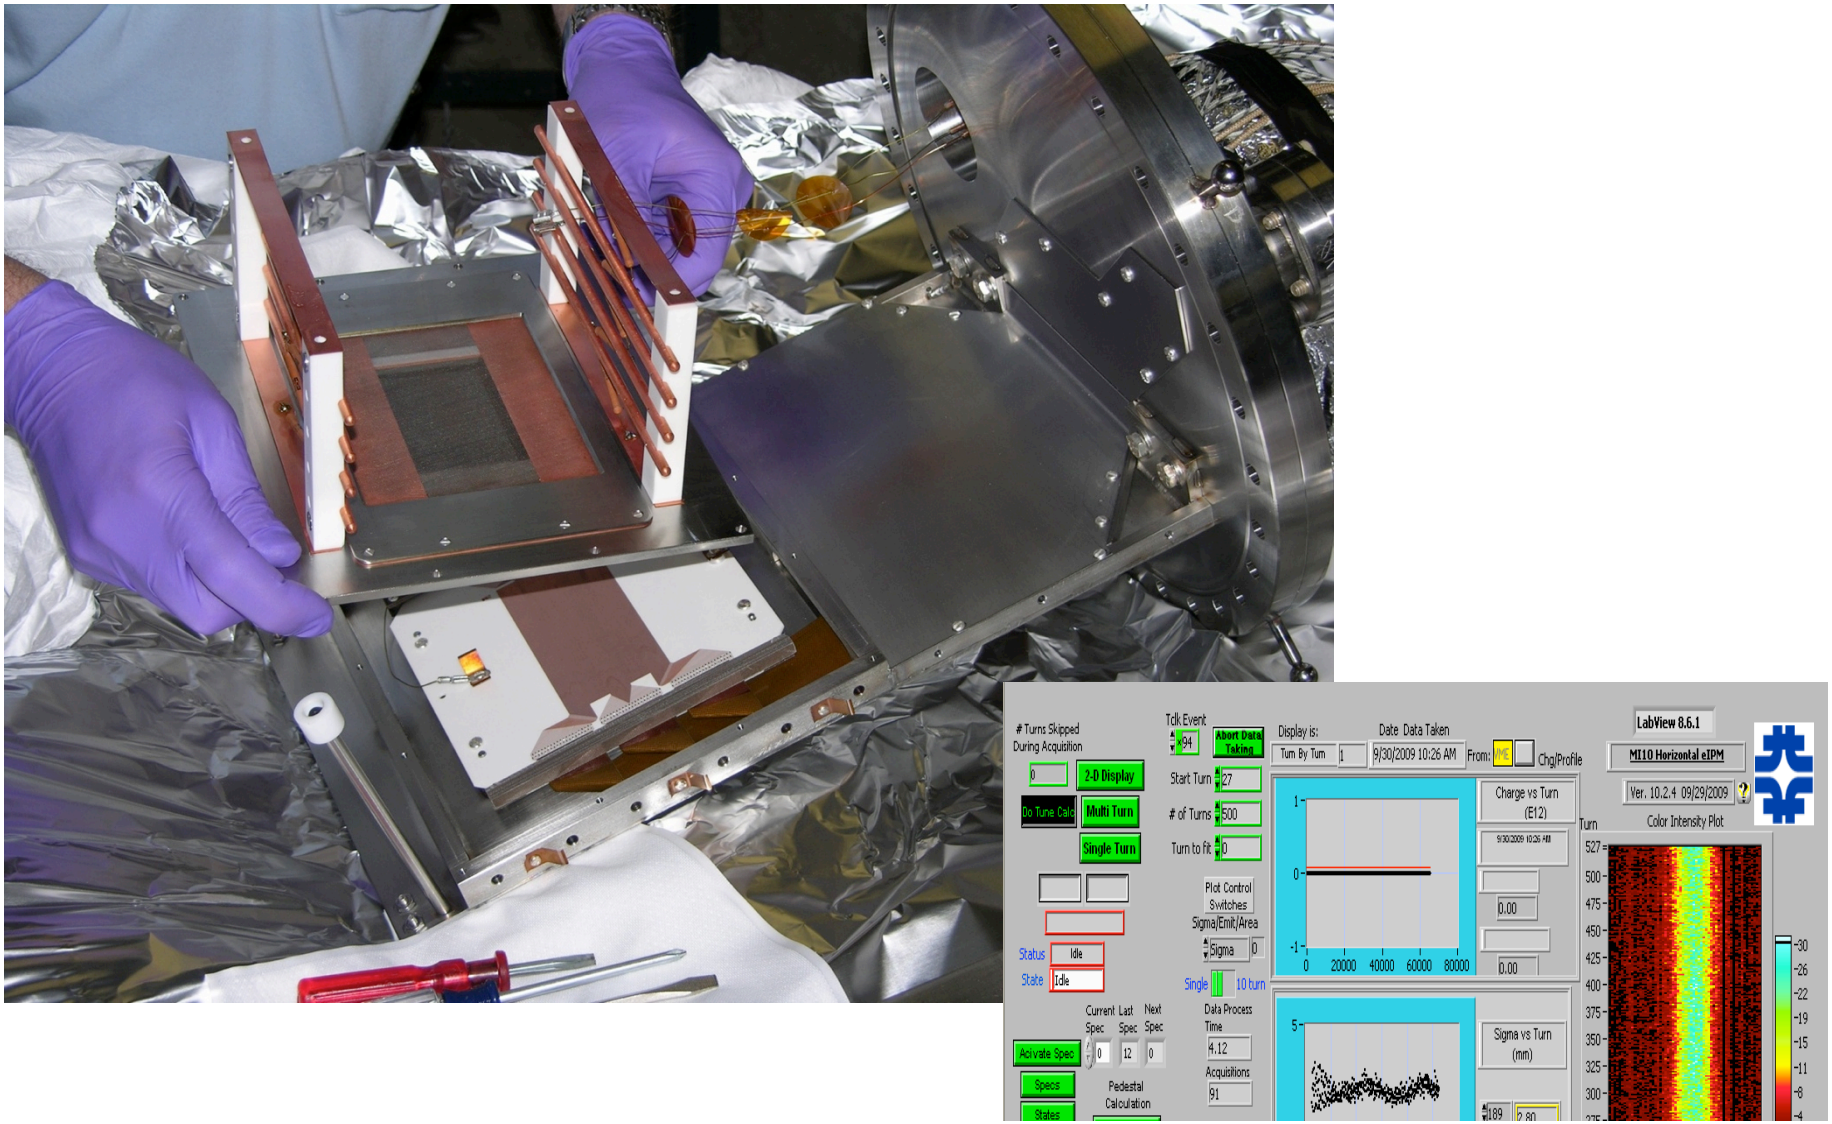
Example of an Installation – Ion Profile Monitor



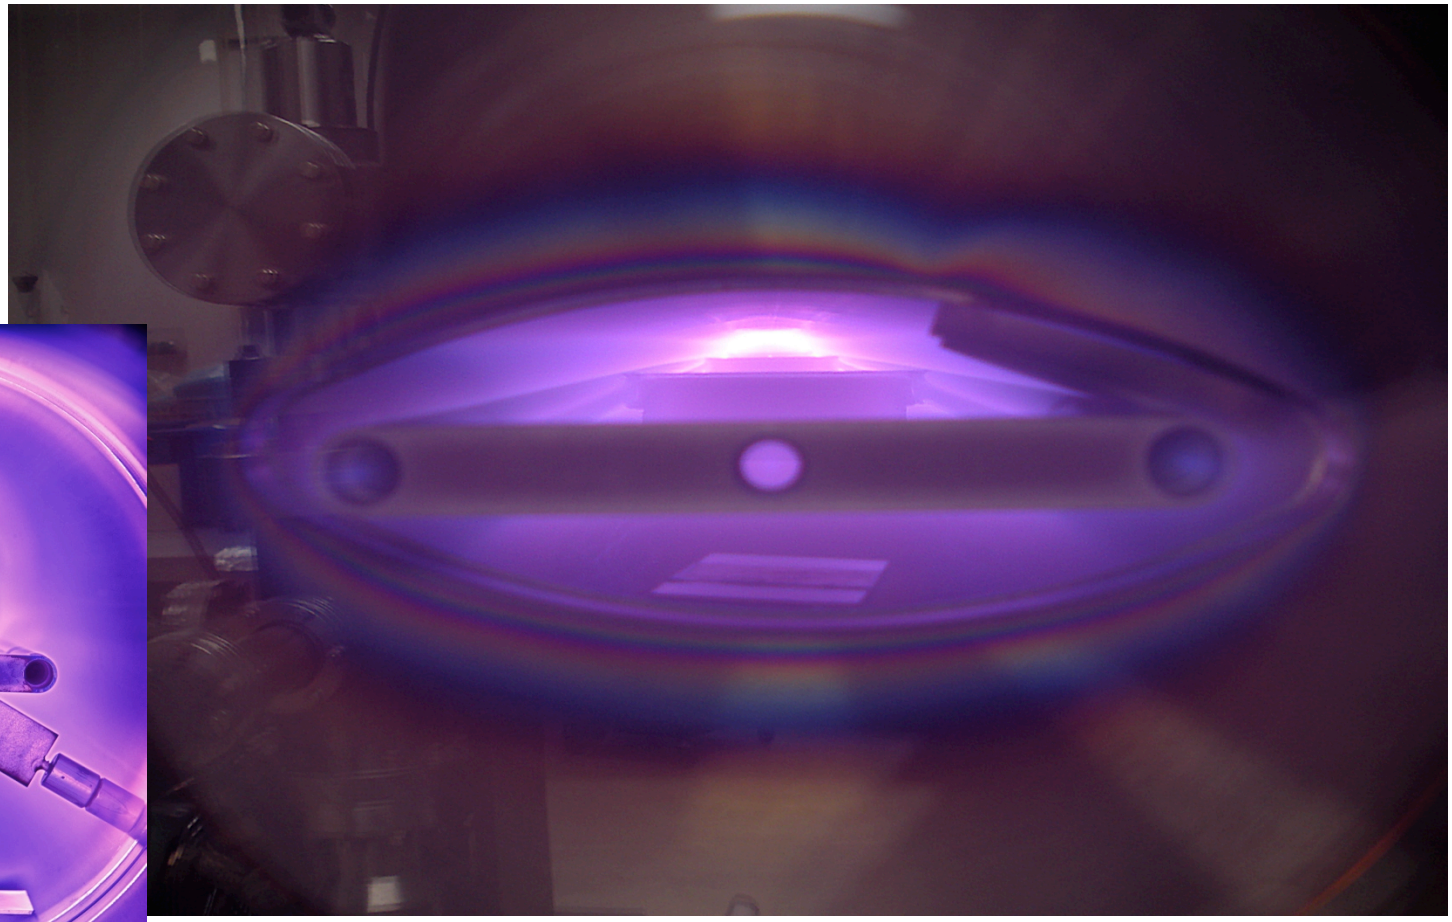


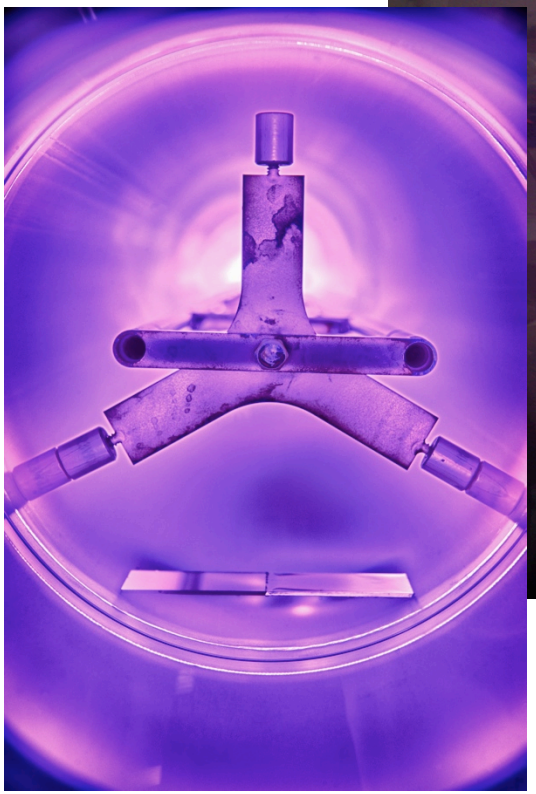


Inside an Ion Profile Monitor



More Small Details – R&D Titanium Nitride Coating

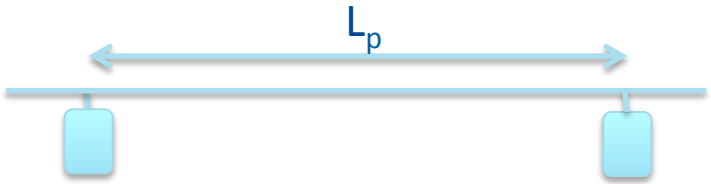




Introduction to Vacuum System Design

Factors that affect vacuum system design to reach specified pressure:

- Volume of system
- Materials (outgassing rates)
- Pump size and spacing
- Conductance to all volumes (to pumps, and avoiding virtual leaks)
- Cleanliness of everything within the system



Some starting equations:

$PV=nRT$

$Q=SP$

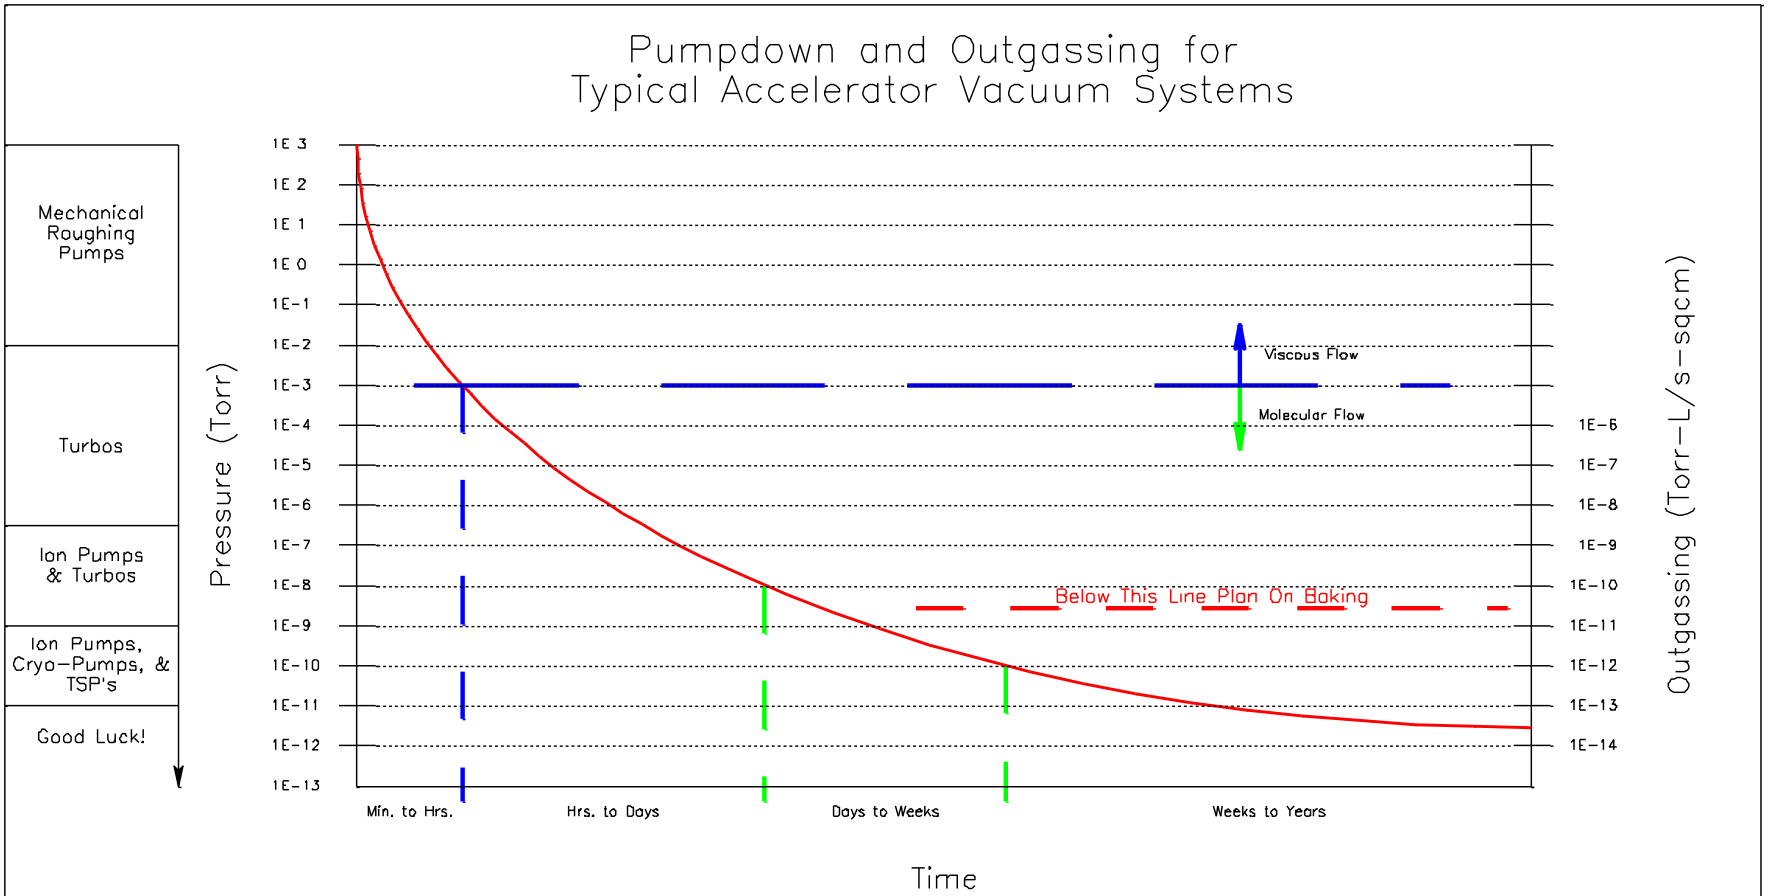
$Q=C\Delta P$

$P_p=q_D*B*L_p/S$

P=pressure
V=volume
n=number of moles
R=universal gas constant
T=temperature
Q=gas flow

S=pump speed
C=conductance
P_p=pressure at the pump
q_D=specific outgassing rate
B=inside tube perimeter
L_p=pump spacing

Vacuum System Basics



Note: Information depicted is intended for general reference and may or may not be representative of any real system.

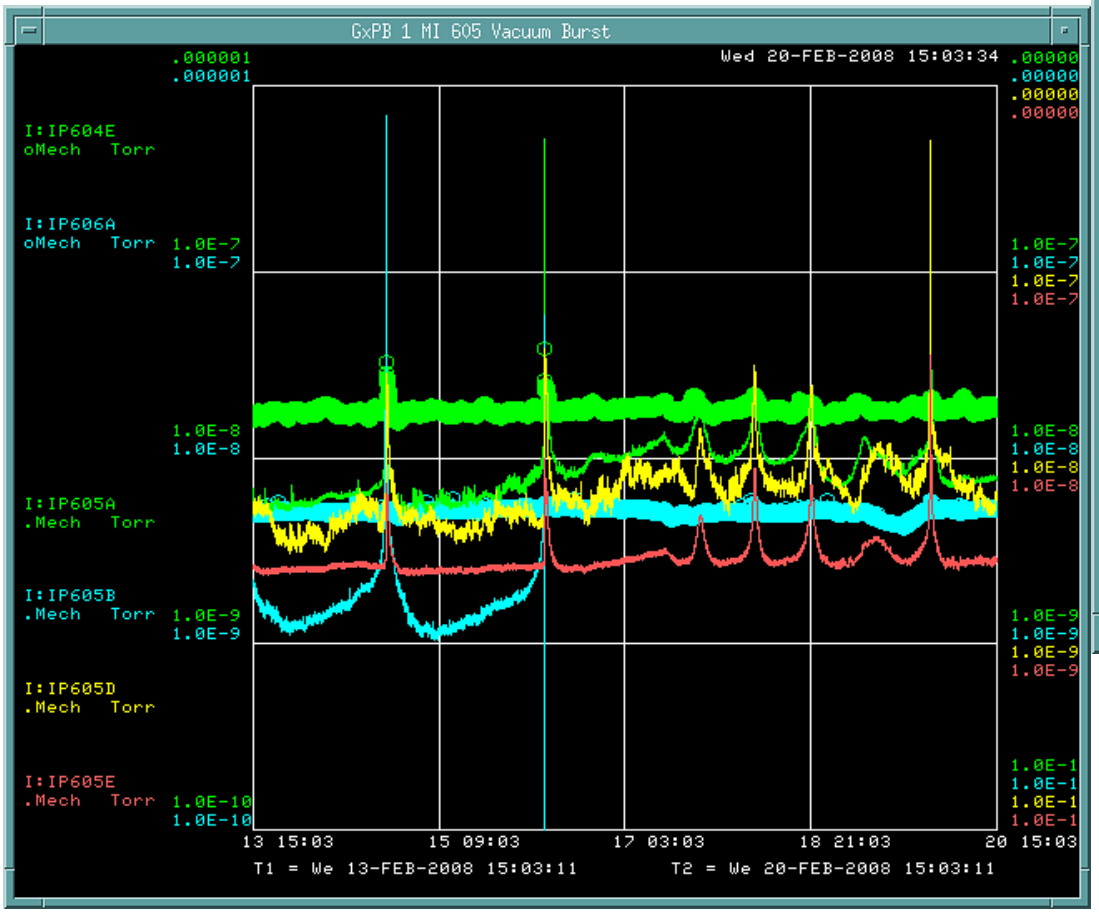
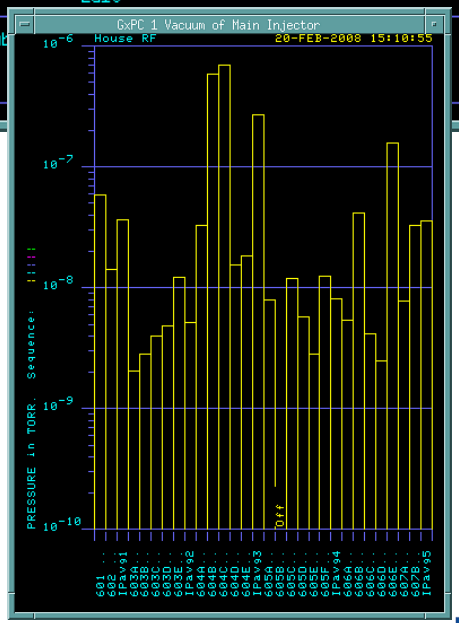
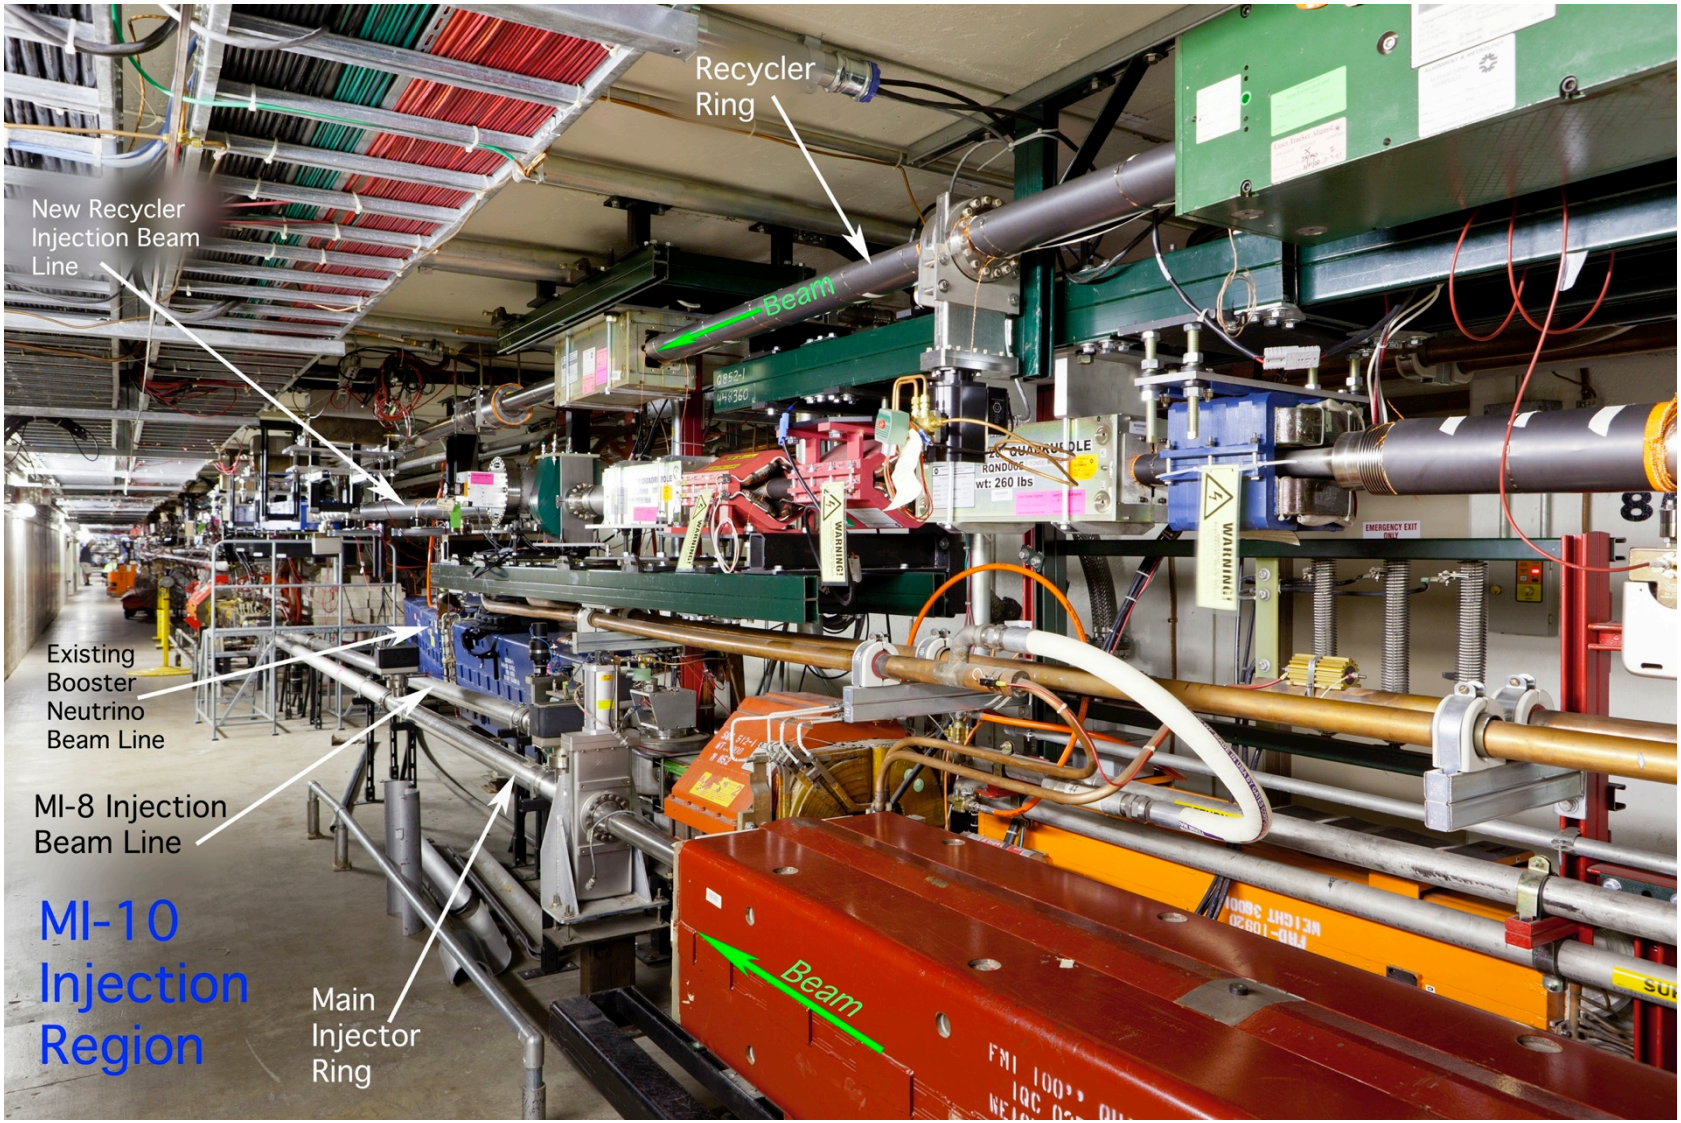
Vacuum System Analysis

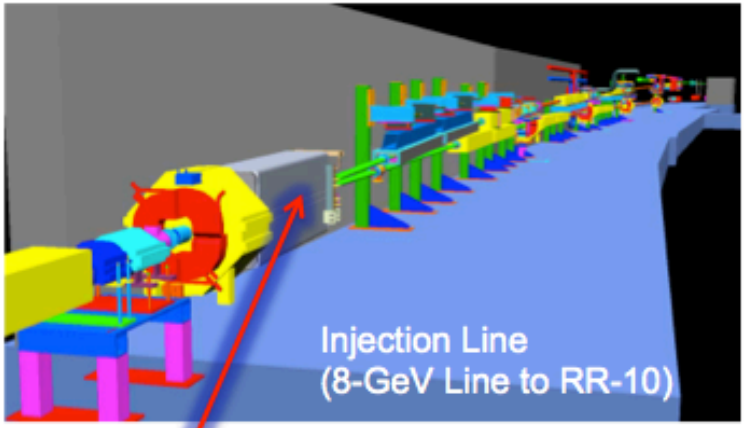


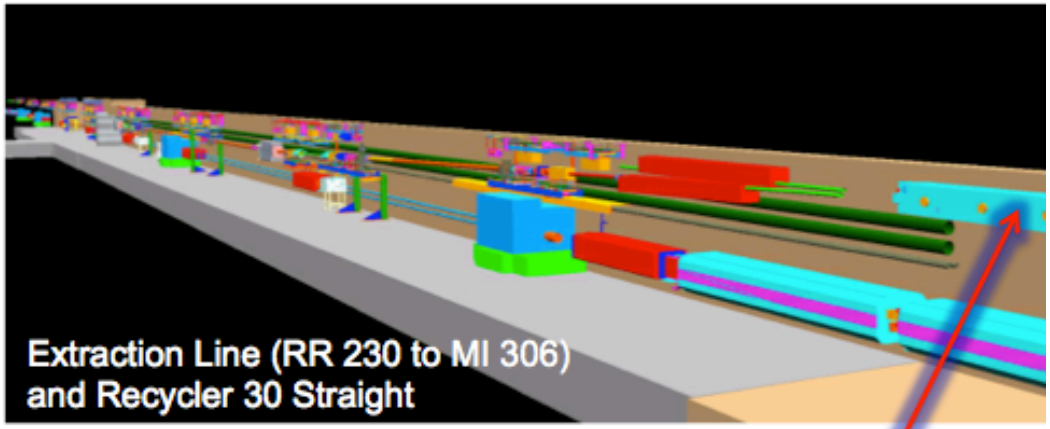


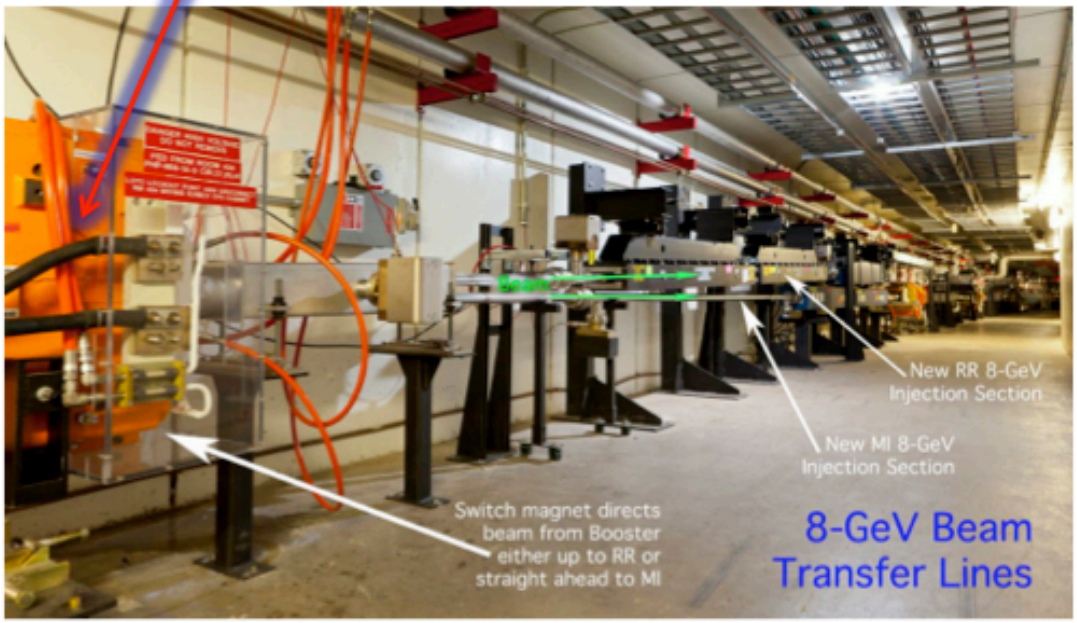
Beamline Design



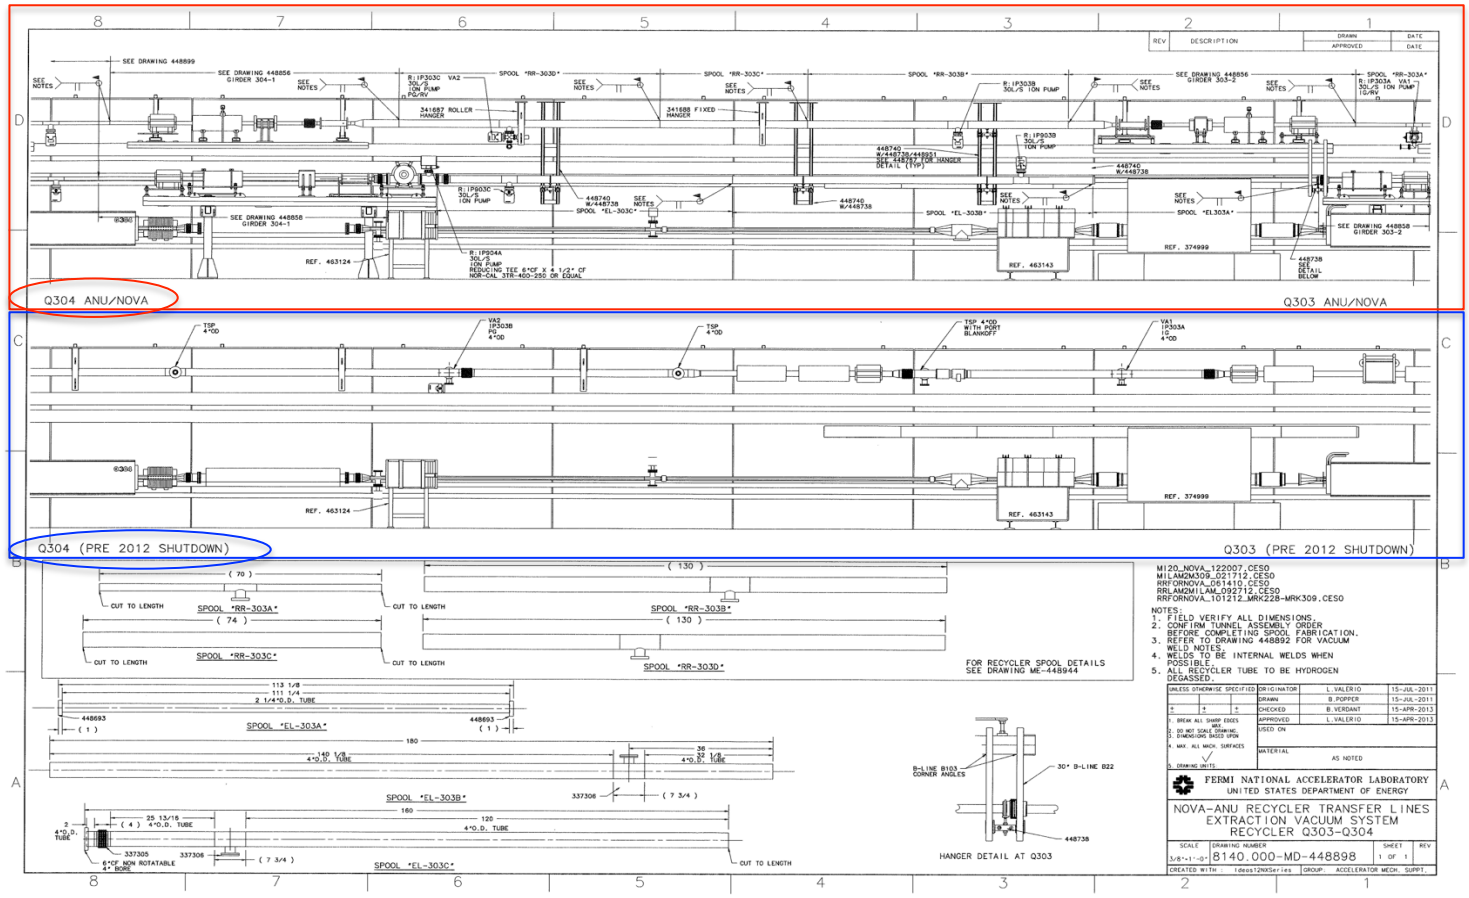
Adding New Beamlines to the Accelerator - NOvA





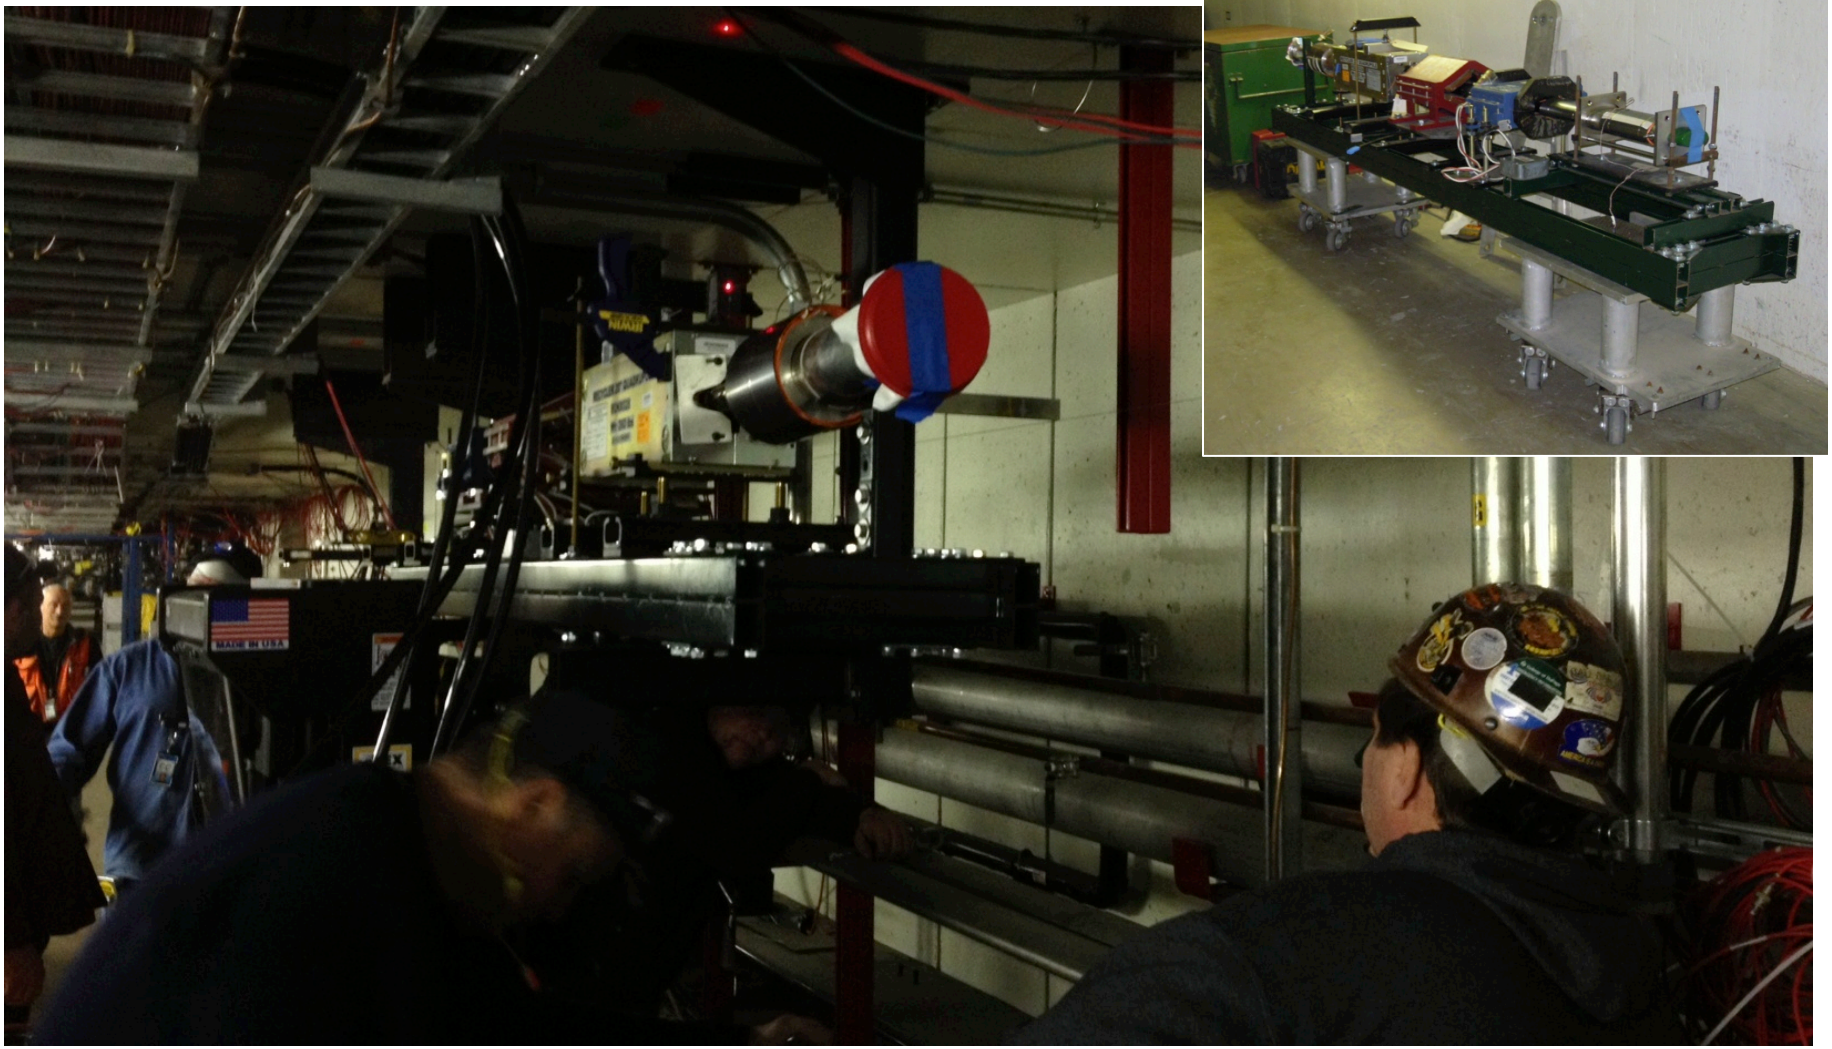


Sample of Installation Drawings - NOvA

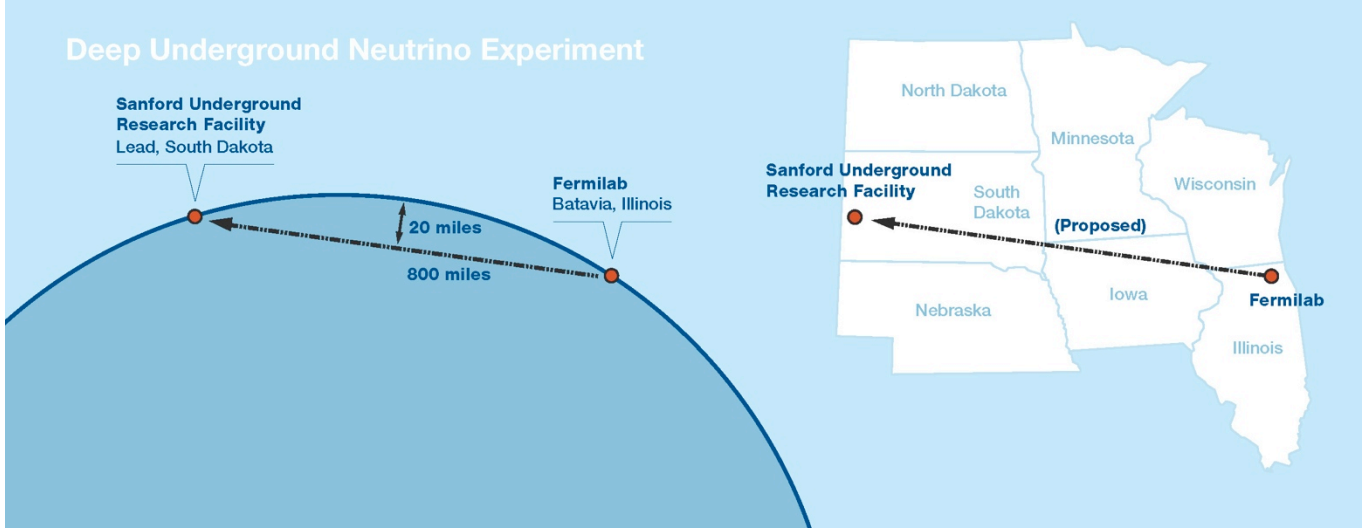


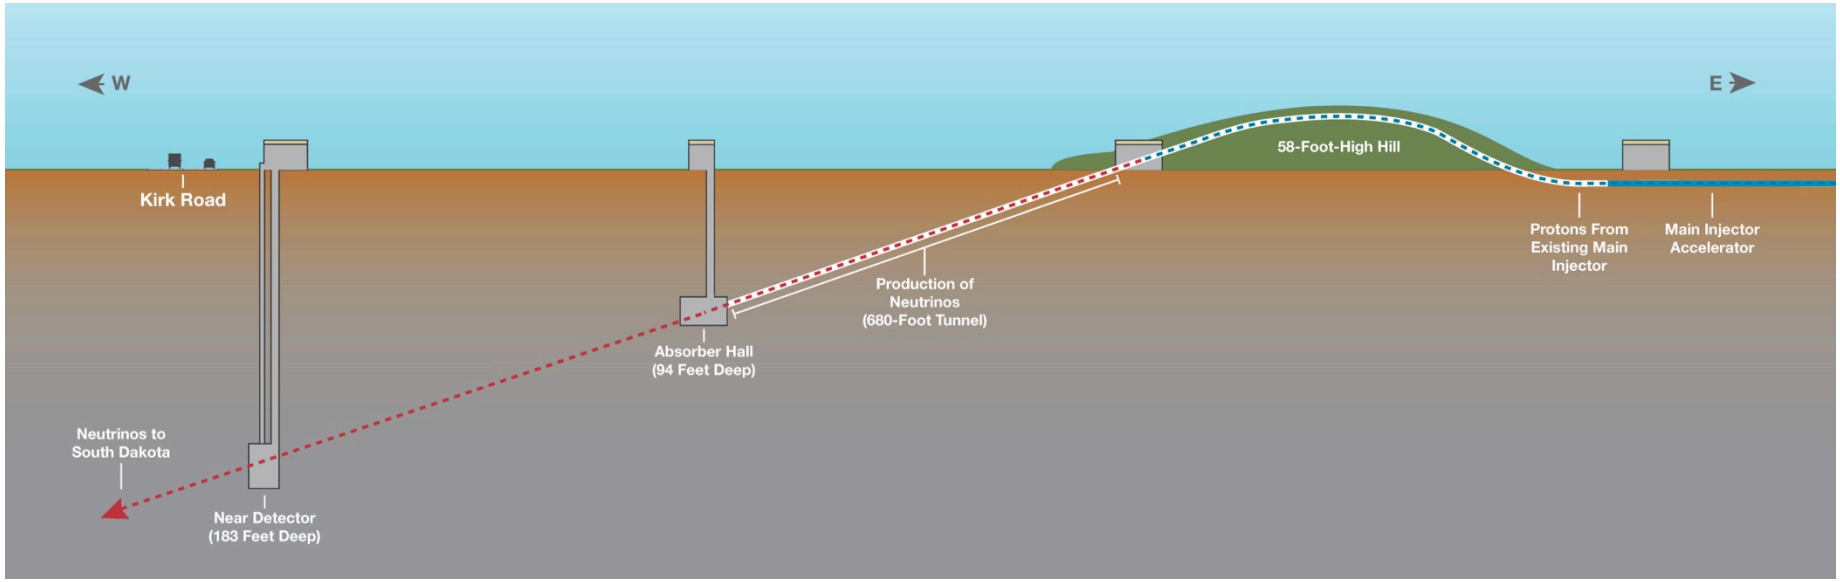
- 29 before & after vacuum system drawings like this were created for three regions of the accelerator.
- Magnet installation drawings were separate.
- Hundreds of supporting drawings.

Efficient Installation in Radiation Areas - NOvA

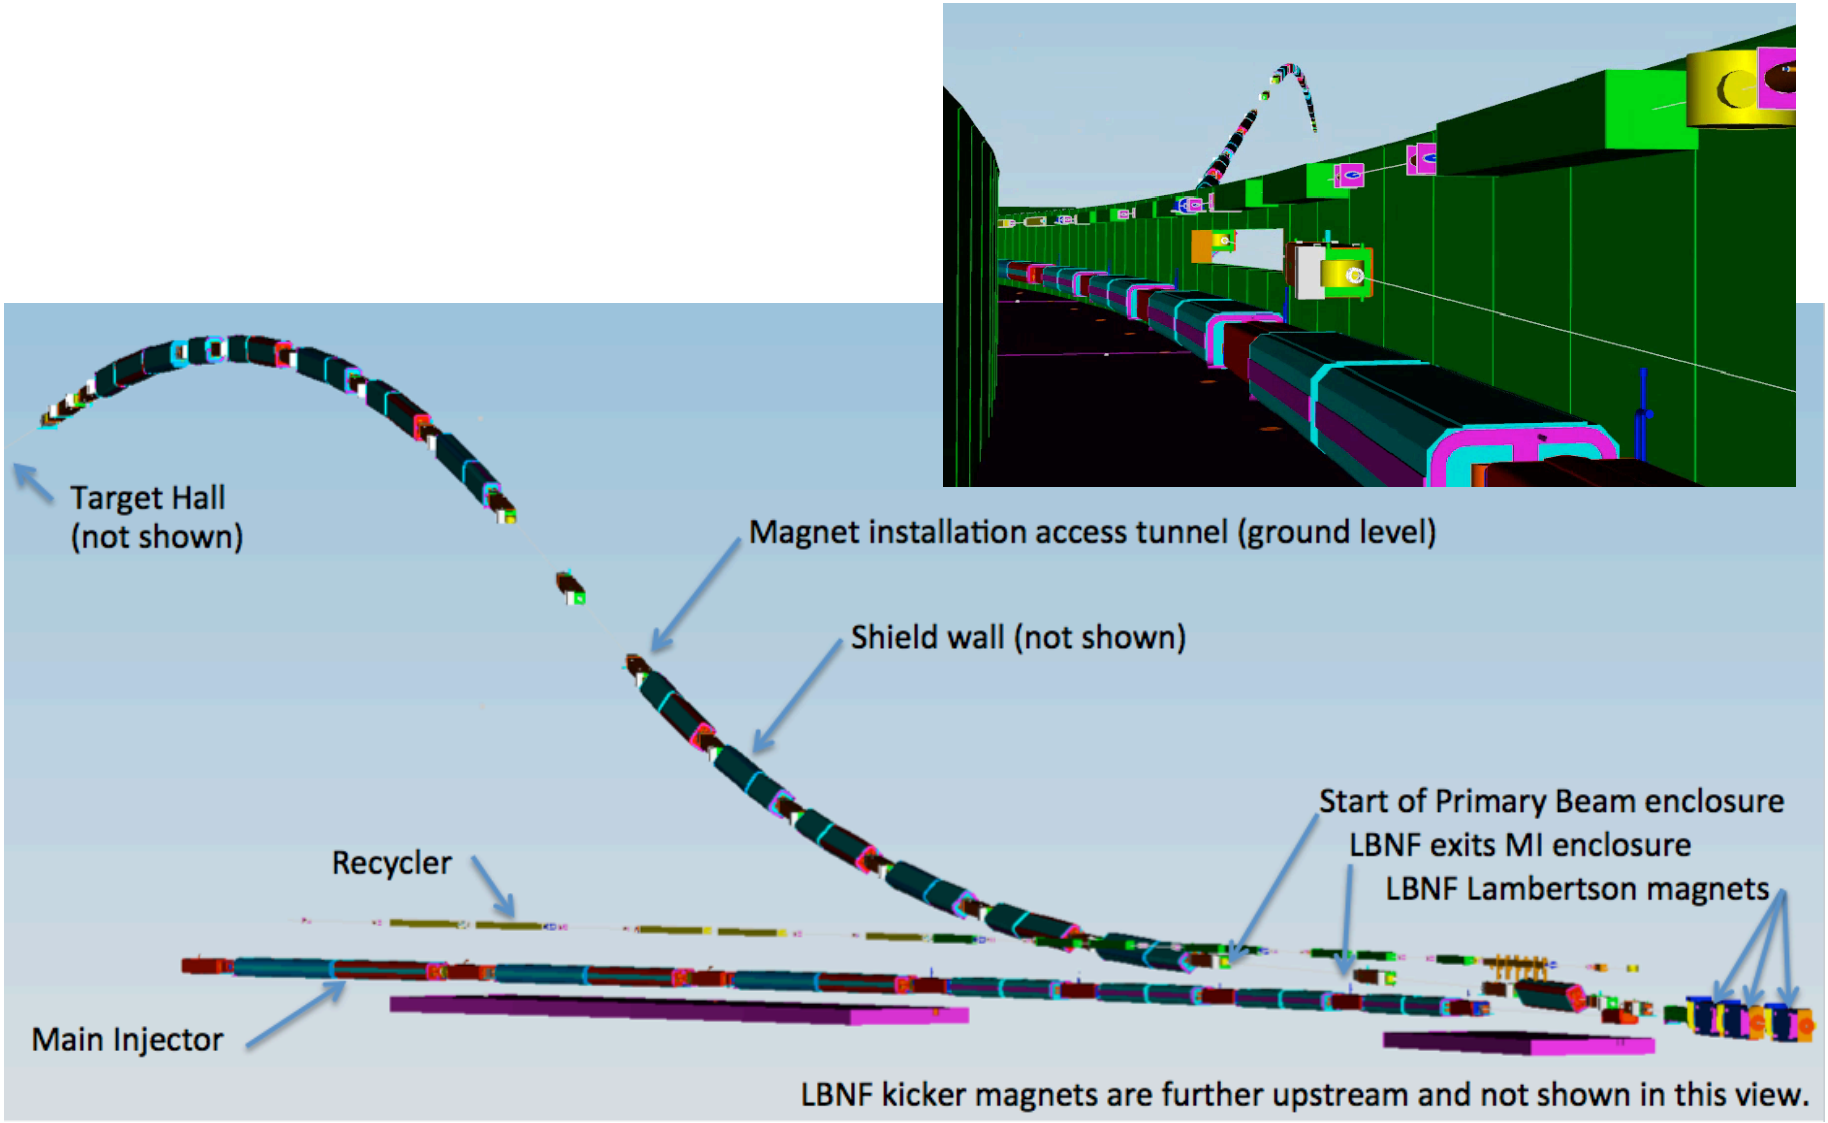


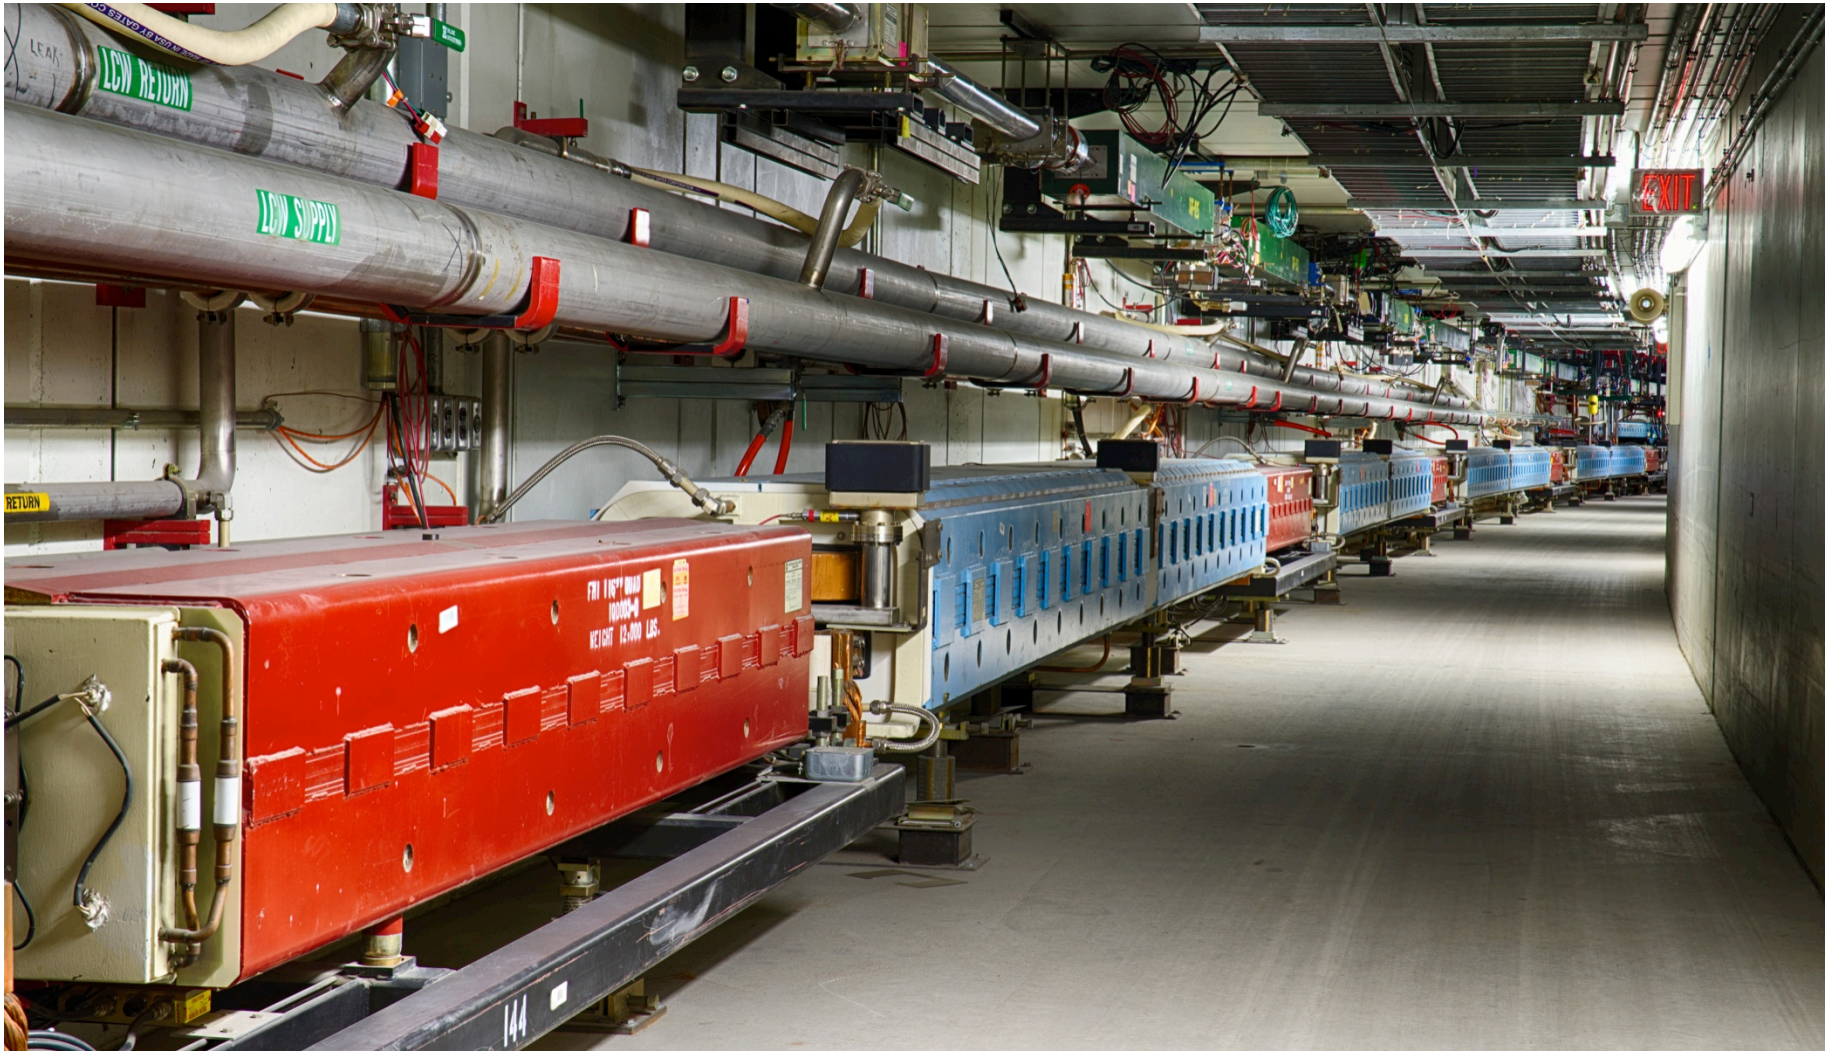
What's Next? Designing a Beamline for LBNF and DUNE





Early 3-D Model of LBNF and Main Injector





The End. Do Accelerators Look Different Now?
